Private Translation with Server-Based Software

Machine Translation server-based software works on-premise with no internet connection. It means that no one has access to your business data. Maximum security for the most demanding customers.

Translate with no limits for a fixed price

The more you translate the more you save
in contrast to cloud based solutions

Prompt Integration with Your Business

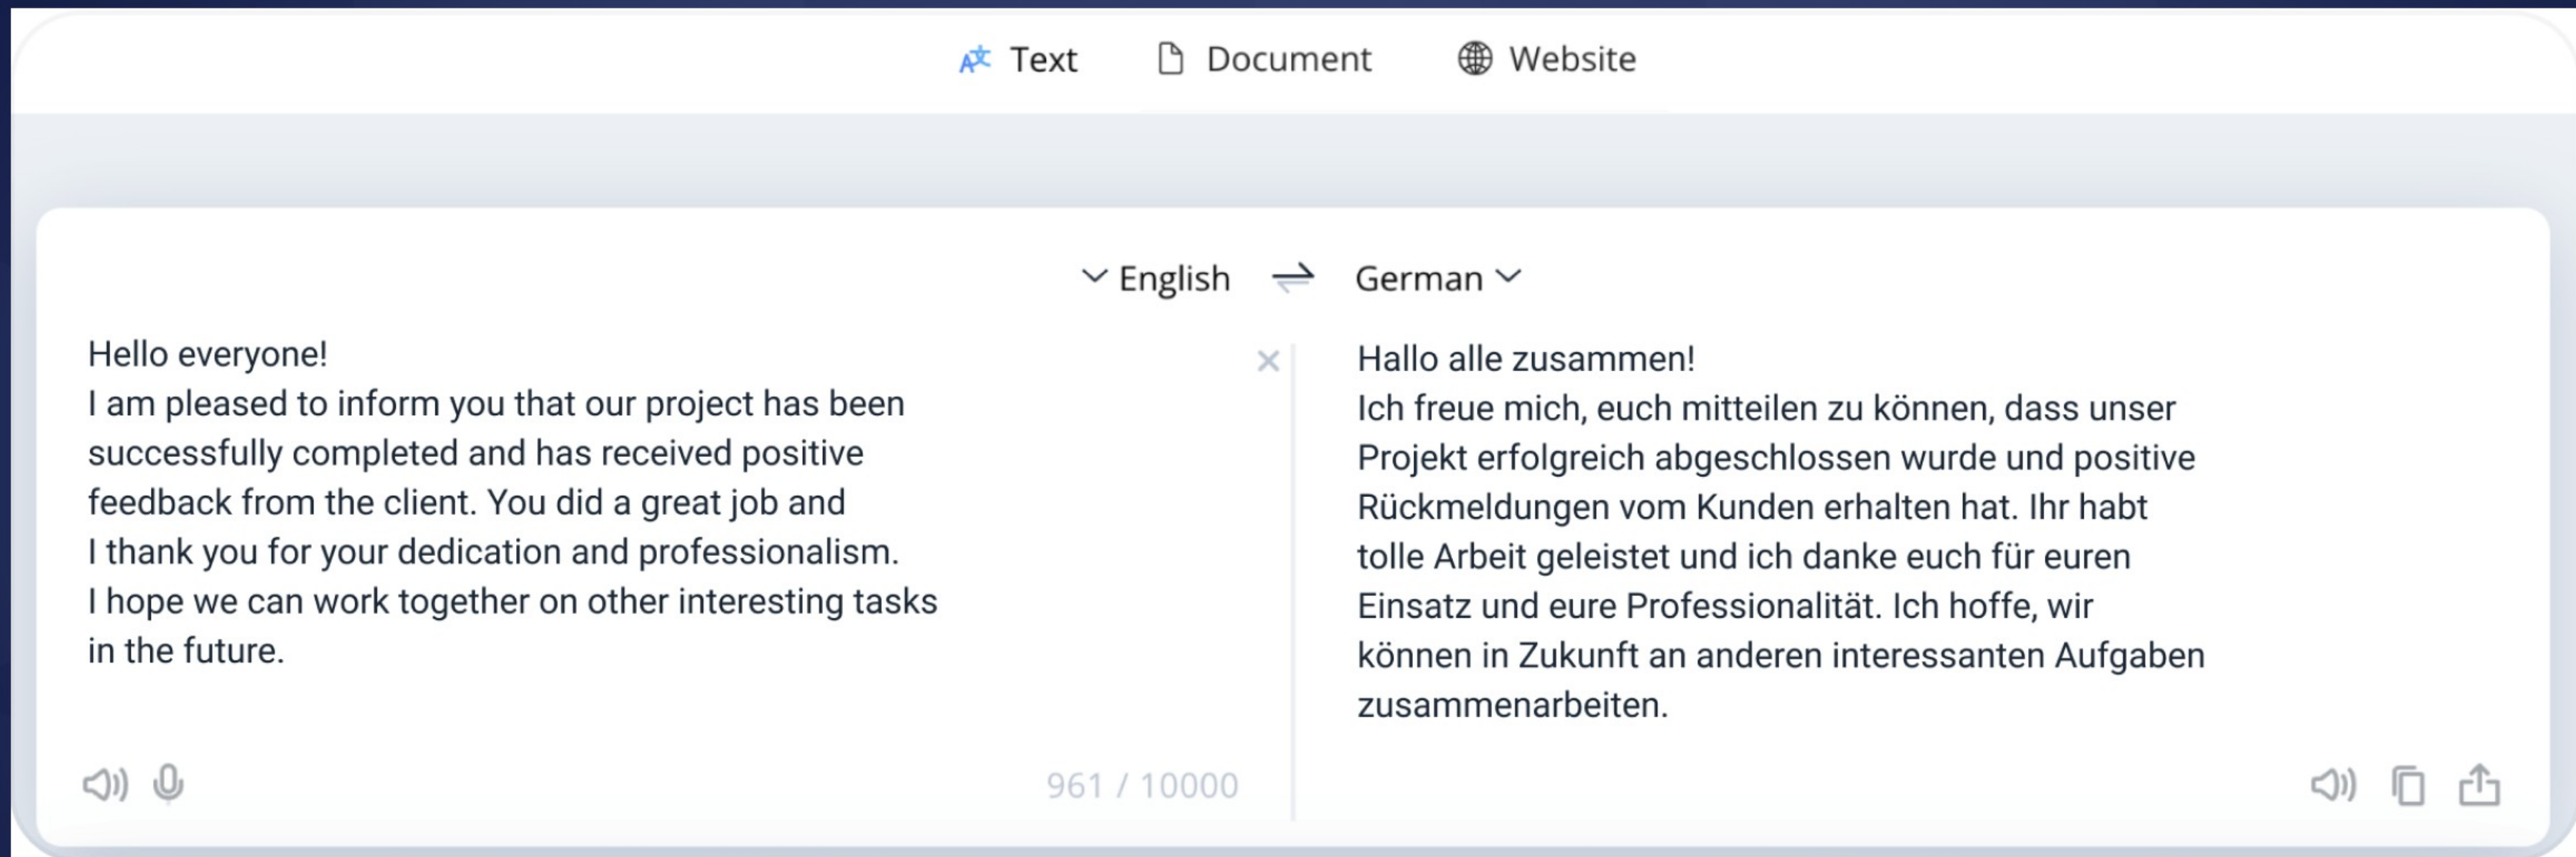

Easy to deploy on a local PC, cloud hosting, corporate intranet or extranet. It supports unlimited user access and seamlessly integrates with any application or service. On-premise software is highly scalable and can be used in any business domain.

Adding **Lingvanex Bot for Slack** allows secure translation of communication for your team globally, in over 100 languages.

Translate text and files manually in browser

Supports unlimited number of users
